Prime Business Health Check  
worth approximately \$695

## **Business Health Check by Prime Strategies Group**

What does a business health check entail?

A business health check is essential for any company looking to grow. It provides an objective, clear picture of where your business is today, where you want it to be, and what roadblocks are impeding growth.

A Prime Strategies Group business advisor will meet with you face-to-face (or via Zoom) and spend approximately 2 hours working through a 360-degree assessment evaluating all critical elements of your business.

The goal of the business health check is to identify areas where your business is already excelling, to identify potential problems before they occur, and to suggest ways to improve your company's performance even further.

A healthy business promotes growth and prosperity for the owner, employees, and customers.

Based on the results of your business health check, the Prime Strategies Group business advisor will be able to advise and assist you in developing a step-by-step action plan tailored to your specific business situation.
